## Career Objective

Full-stack developer specializing in MERN stack with hands-on experience building scalable REST APIs and real-time applications. Strong foundation in Data Structures and problem-solving, with experience developing production-level projects including price tracking systems and automation tools.

## Work Experience

### Backend Development Intern — Humble Walking

June 2025 – July 2025

- Built and maintained RESTful APIs using Node.js and Express.js for scalable services.
- Collaborated with frontend team to design API contracts, improving integration efficiency.
- Debugged and optimized server-side logic for better reliability.

### Research & Development Intern — Robokart

Dec 2024

- Conducted sessions teaching Arduino, sensors, and electronics basics.
- Demonstrated IoT projects and guided students in hands-on hardware circuits.
- Collaborated with faculty to design engaging beginner content.

## Projects

### Price Tracking Web Application

[\[GitHub\]](#)

Working on a web application that tracks product prices from different e-commerce websites.

- Designed and developed 10+ REST API endpoints handling product data and user requests
- Implemented a web scraping pipeline using Cheerio, reducing data fetch time by 30
- Integrated React frontend with backend APIs to display real-time price tracking
- Scraped product prices using Cheerio and Axios.
- Displayed price data and history using React and MongoDB.

### WhatsApp Bot Automation

[\[GitHub\]](#)

Built a WhatsApp bot using Node.js.

- Validated user input and stored data in MongoDB.
- Created simple REST APIs to manage user data.

### Institute Management System

Built a full-stack role-based system for students, faculty, and admins.

- Implemented JWT-based authentication with protected API routes.
- Designed MongoDB schemas and REST APIs for attendance, classroom occupancy, and issue management.
- Built reusable React components and integrated APIs using Axios for dashboard updates.
- Used backend middleware for request validation and access control.

## Skills

**Languages:** JavaScript, C++, Python

**Web Technologies:** HTML, CSS, React.js, Node.js, Express.js, next.js

**Databases:** MongoDB, MySQL

**Core Concepts:** Data Structures, REST APIs, DBMS, OOP

## Education

### B.Tech, Electronics and Telecommunication Engineering

2022 – 2026

Shree L R Tiwari College Of Engineering

### Senior Secondary (XII)

2021

Sardar Vallabhbhai Patel Vidyalaya and Jr. College, Mumbai

### Secondary (X)

2019

Mother Mary's English High School, Thane

## Certifications & Activities

- Solved 300+ DSA problems
- Completed GFG 160-day challenge
- Built 3+ full-stack applications
